

# D-8800

# GRAPHICS GENERATOR FONT LIBRARY

## Font Descriptions

This series of Video Fonts is designed for use with the Datavision D-8800 Character Generator. The styles and sizes shown on this sheet are part of our growing Video Typography Library. Additional fonts will be added regularly. Also, custom alphabets and logo fonts can be prepared to your specifications. Fonts consist of complete high-resolution, alpha-numeric character sets. Characters are fully proportionally spaced for true letterforms. Unless shown otherwise, fonts contain complete upper case characters, lower case characters, numbers, and standard punctuation. A series of standard symbols is also provided.
