Texscan MSI's (SG-Edit W)

VCR Control
Texscan MSI's (CSS-MINI PLUS or PB-1)

The EAS 911 Alert System shown above illustrates the use of a single character generator system used for a community bulletin board to now also provide the required EAS Alert without the purchase of an additional character generator.

Texscan MSI's TFT 911 Custom Chip Set in TFT's 911 Receiver provides a very economical solution for cable systems. This Solution, in many cases, takes advantage of the Texscan Character Generator currently in place.

For additional information and the above listed equipment and services, please see individual product and service brochures.
