VIDEO TITLEMAKER 3000

- High resolution titles
- Over 200 font/size combinations
- Over one million colors
- Separate full-size keyboard with special characters
- Stores over 16,000 characters on hundreds of pages
- Multi-directional eight- speed scroll and crawl
- Special effects
- International language support

Now you can add crisp, dazzling, professional-looking titles to any video production! The new TitleMaker 3000 is a technological breakthrough in video character generation. It delivers high-resolution titles in a million colors. The full-size keyboard includes accented characters for 21 different languages. Advanced features include patterns, see-through video effects, multi-direction scroll and crawl, fades and wipes, and much more.

Amazing Resolution

TitleMaker 3000 uses digitial video technology to produce high quality letters with smooth curves and sharp edges.

Versatile Keyboard

Easy to use separate full function keyboard allows you quick and easy access to special effects and making changes on the fly.

A Million Colors

When creating your titles, outlines, backgrounds, and borders, you can select from over a million colors. You can also choose from a set of "patterns," such as "rainbow" to give your titles a unique one-of-a-kind look and feel.

Multiple Font Selection

TitleMaker 3000 has over 200 font/size combinations, including script, Old English, and many more. The fonts are specifically designed to look great on video. Each line of text can be enhanced with drop shadows, several grades of bold letters, outlines, eight-speed scroll and crawl, and much more.

Proven Speed

Increase your productivity with the TM-3000's newly redesigned, state-of-the-art on-board processor.

Versatile Superimpose

Titles can be superimposed over video or over colored or patterned backgrounds. Video can also be used as a "color" for titles, backgrounds, or outline/shadow areas. You can even use dimmed or tinted video as a background for stunning "video-on-video" effects.

Special Effects

There are 24 special effects for transitions between title screens, including cuts, fades, wipes, and more. Each effect can be executed at any of eight different speeds.

Extensive Memory

TitleMaker 3000's memory will hold over 16,000 characters. You can store hundreds of projects. A long-life lithium battery ensures that your titles will remain in memory, even when the unit is unplugged.

Convenient Preview

An extra output allows you to change titles on a secondary monitor without interrupting the signal to the primary monitor.

Projects/Pages

Pages can be stored under separate projects. You can work on the pages in one project without affecting those in another.

Instant Page Access

The page index screen displays the first line of text from each title screen you create for easy page identification and access.

Video TitleMaker 3000

FEATURES

- High resolution titles: 720 x 480.
- Broadcast quality video.
- Over 200 fonts and size combinations.
- Drop shadow, outline, bold, variable character spacing.
- Over a *million* colors — apply separately to letters, outline, background and border.
- 24 special effects (fades and wipes), eight speeds.
- Eight-speed, four-direction scroll, crawl (eight speeds). Scroll-in one direction, hold, scroll-out another direction.
- Superimpose (genlock): Title over video, or use video for letters, outlines, or borders.
- Each line can use a different font, size, and style and different colors for letter, outline, and shadow.
- 32 rainbow and pixel patterns, including animated patterns, can be applied to backgrounds, letters, outlines/shadows, and borders.
- Background video mix: Mix colors or patterns with video for see-through or tinted-video effects.
- Preview output allows you to change titles out of audience's view: Output carries untitled input video until changes are done.
- 16,000 character memory, hundreds of pages.
- Organize pages into separate "projects." Work on one project without affecting others.
- Page index provides rapid access to any page and any project.
- On-screen text editing features include undo and clipboard-style copy and move.
- Multiple play modes: Play a pre-arranged program ; play pages manually (slide show); play a sequence repeatedly (video billboard); play one page.
- Full keyboard includes special and foreign characters such as ©, ü, •, ø, etc. Special characters are marked on keyboard, and easily accessed with "ACCENT" key.
- Includes pictorial characters (heart, bullets, etc.) and elegant "curled" quotes.
- Built-in demo shows features. Can be modified or used as basis for new titles.
- Video and audio inputs and outputs. Both S-video and composite (RCA) jacks for video in and out. Preview out is composite.
- GPI trigger input allows remote trigger of titles from external controller (such as Thumbs Up editor).
- 5-year lithium battery backup.
- Compatible with all video sources and tape formats.
- Lightweight, rugged construction.
- Two-year warranty.

What's new in TitleMaker 3000…

Videonics introduces TitleMaker 3000, an improved version of the popular TitleMaker 2000. *Here's what's new:*

- Separate full-size keyboard puts everything at your fingertips
- More fonts: TitleMaker 3000 has over 200 font/size combinations, twice as many as the TM-2000
- Over three times the speed for greater productivity
- Numbered fonts allow for instant access — no need to scroll
- A real-time clock/date display can be used to trigger pages
- TitleMaker 3000 has twice the memory: 16,000 characters can be stored on hundreds of pages

The great features of TitleMaker 3000 add up to an exceptional value.
